Our
Philosophy

The environment has to adapt to people's needs.

People with reduced mobility are well aware of this simple truth. In order to help remove as many physical limitations as possible, we design and manufacture products pursuing a fundamental belief: it is the environment that has to adapt to people and not the other way around.

Beauty matters.

We believe that beauty and elegance create comfort.

Whatever the reason be that we find ourselves in a Healthcare facility, being surrounded by beautiful things reassures us that we are being treated in an environment that cares and has given thought to our needs.

We believe that beauty matters and helps people to be serene. It creates continuity between the comfort of our houses and the temporary visit to a Healthcare facility. That's why our products are designed to mix smooth functionality with spotless elegance.

Our Values

Future focused.

We understand that we will always be better if we are aiming towards something big, ambitious and inspiring...

...something that truly connects real products with work / life missions and not just short term needs. In other words, we design and make products that are useful and relevant now and in the future.

Inclusivity.

We support the right of everyone to feel safe and independent in their environment, regardless of age or mobility.

Beautifully designed products transform the everyday world into a safer, more flexible and more pleasing environment for everyone.

Utility and beauty.

We believe that artefacts can only be beautiful if they are well considered and well designed.

Therefore useful design must also fulfill its intended function – building on sustainability so that design and materials are durable and not just a trend.

Dynamic mindset.

Readapting the bathroom environment brings many advantages.

We provide solutions that grow with the needs of the user. We are passionate, confident and focused on the future. We make a difference to people's lives and support and encourage a culture of innovation.

The smart system designed to make the bathroom environment flexible.

At the heart of Profilo Smart lies the track and cover. This simple, clever solution affords flexibility at the heart of the bathroom.

Our track is an aluminium profile upon which you can attach, move, adjust and easily remove bathroom accessories.

—

Our unique system, has been built around 3 main features ⸺
01. It is flexible.

Our accessories are easy to move and adjust: they adapt to the user's needs, allowing him or her to experience a superior level of comfort and autonomy.

02. It is modular.

Our products can be added or removed from the track within minutes, leaving the bathroom ready to adapt to different users, situations and needs.

03. It is customizable.

Our range of covers for the horizontal track have been designed to match every possible style of bathrooms. It is possible to choose from an endless number of colours, using inserts of every possible material and even using coatings to hide the track and completely and merge it into the environment's ambience.

In well-designed buildings, people smile more.

Health depends not only on the care we receive from our healthcare professionals, but also on the environments in which we live, work and play.

Research shows us that patients recover faster and workers are happier in places that are sensitively designed, offer opportunities to personalise and have a strong aesthetic viewpoint.

At Profilo Smart, all our products go beyond the functional to address that perfect balance between beauty and utility. Our elegant and versatile tracking system, unlimited colour palettes and beautiful accessories allow architects and designers to create stunning bathrooms that offer endless design possibilities for positive, supportive environments.

Healthcare is changing. For good.

Traditionally healthcare bathrooms have been designed for efficiency, and often take a 'one-size-fits-all' approach. But that doesn't offer patients and caregivers the ability to choose the right kind of environment for them. When they have choices, patients have a sense of control that helps them feel more empowered, engaged and less stressed. As this focus expands beyond treating illness, to include wellness and wellbeing, patients, their families and health professionals are actively participating throughout the continuum of care.

We work with leading healthcare organisations to create safe and efficient bathroom solutions that inspire greater connection, empathy and wellbeing for everyone involved in the experience of health.

We design for architects

We support architects to create beautiful bathroom environments that enhance the wellbeing, empathy and connection of clinicians, patients and caregivers.

Flexibility is not a concept simply related to the functionality of Profilo Smart, but it also deals with its style. Our system not only adapts to the ever changing needs of the users, but it also adapts to the unique style of the individual architect, giving him or her the chance to match Profilo Smart with every possible design concept, thanks to the choice of an infinite palette of colours and materials.

Architects have the possibility to integrate the system into the style of an environment, make it stand out emphasising the aesthetic qualities of aluminium or just making it disappear, merging Profilo Smart into the bathroom environment.

We care about caregivers

Thanks to its intuitive ease of use and extreme simplicity, Profilo Smart represents the perfect ally for caregivers during their everyday mission to help users.

Nobody knows better than caregivers how important independence is for those who have a reduced mobility or how important it is to enhance the autonomy of the user for their self-esteem and recovery process. Profilo Smart's system has been designed specifically to remove some of the physical limitations that affect people in healthcare institutions and, in doing so, makes the caregiver's job easier and more effective.

PRODUCT FEATURES

Flexibility

A flexible environment is a smart one:

It is versatile and can be adapted depending on the individual needs of each user. In addressing these needs, we created a system that balances the effect of reduced mobility, thanks to the ability to move accessories in different directions.

Our products can be:

Height and sideways adjustable

These products are designed to be attached on the horizontal track as well as on a vertical track, allowing them to be adjusted both horizontally and vertically. These features create the ideal solution for environments that will be used by a variety of different users who will have individual requirements.
Height adjustable

This range of products comes with a wall mounted vertical track that allows users or caregivers to adjust it vertically. It is the ideal solution for environments that have to address multiple users with a similar condition.
Sideways adjustable

Many of our products are designed to be moved horizontally along the track, facilitating a versatile environment.

Fixed

We completed our product range with a series of fixed on the wall but foldable items that are ideal for stable users and for public areas.
Removable

The wide range of items designed for the horizontal track, can be easily removed when not in use. This feature brings a great versatility to the environment allowing the bathroom to completely adapt to different needs.

Adjustability

Whether it is the user or the caregiver or the person in charge of adjusting the height of our products, we created a solution for every necessity.

Electric adjustable
Some of our washbasin brackets and shower seats can be height adjusted electrically.

It is the ideal solution to ensure more autonomy and privacy for the user, but it is also very helpful when the caregiver has to frequently adjust the product.

Manually adjustable
Simply lift the vertical lever lock, adjust the height and then close it again.

Our products are very easy to attach, adjust, move and remove without the necessity of special tools. The ease of use of our products is what ensures flexibility in the day-to-day operations of our system.

Zero-gravity

Some of our washbasin brackets can be height adjusted with a zero-gravity system.

This is a gas-spring assisted mechanism that allows users or caregivers to adjust the height of a washbasin by simply lifting a finger. This is the ideal solution to ensure more autonomy for the user, while being very helpful for the caregiver who has to frequently adjust the product.

An unparalleled hygienic standard.

At Profilo Smart we know how hard medical professionals work to ensure equipment safety and a clean environment. That is why we take this issue very seriously.

Profilo Smart decided to stand in the front line of prevention and has adopted innovative, cutting-edge solutions to prevent bacterial contamination.

___

Healthcare-associated infections (HAIs)

Diseases patients can contract while receiving medical treatment in a healthcare facility – are a major, yet often preventable, threat to patient safety.

These specific type of cross-infections are determined by the transfer of harmful micro-organisms. Bacteria and viruses are among the most common cause of HAIs and the spread of these infections can occur between people, pieces of equipment, or within the body. Healthcare-associated infections can cause many unexpected and dangerous complications.

Anti-bacterial plastic varnishing

All the plastic components of our products are treated with an innovative varnishing that secures a superior hygienic standard, ensuring the material is anti-bacterial.

Easy to clean

All of our products has been designed using only neat surfaces that make them very smooth and easy to clean. This is a fundamental pre-requisite for a superior hygienic standard.

Anti-bacterial sitting cushion and backrest

Our shower seats are equipped with XL EXTRALIGHT® material. Soft, comfortable, flexible and anti-slip it also ensures the highest standard of hygiene thanks to its anti-bacterial properties.

Our Product Lines

Smart.

Flexibility is the single most defining feature of Profilo Smart and its unique system. That is why we included every flexible item in the SMART line. Whether one of our products is height or sideways adjustable, it is SMART.

Easy Smart.

Easy Smart is the name of our new basic line of flexible products designed to make our offer wider and more responsive to our different client's needs.

Classic.

We designed a range of wall mounted, fixed products, with a superior quality and an elegant, timeless design. We call this product line CLASSIC.

Easy Classic.

This is the name of our new basic line of fixed products.

Accessories.

We included in this category all the accessories that are not purposely designed for the track.

Colours

Profilo Smart flexibility is not only about function. It's also about aesthetic.

Architects can enjoy the adaptability of our design that allows them to choose between a range of standard colours or to request a customised one (the minimum quantity order for customised colours is 100 pieces).

Our design also allows them to choose between matching the style of the environment or creating a contrast to help the elderly and people with visual impairment.

We have five standard colours for shower seats & arm supports:

Colour		
Black	CODE 30	RAL 9005
White	CODE 00	RAL 9016
Red	CODE 10	RAL 3002
Blue	CODE 20	RAL 5003
Dark Grey	CODE 35	RAL 7021

OUR PRODUCTS

Track & Cover

Profilo Smart's Track & Cover is what makes our system flexible. It enables the bathroom environment to adapt to anyone's need and offers an unprecedented level of comfort and safety.

Profilo Smart's versatility not only encompasses functionality but also aesthetics. Our cover offers almost limitless design freedom and allows for an infinity of patterns, colours, inserts, finishing, designs, printing, etching, engraving, coating and others.

The track has been designed to support a LED system and to allocate electricity cables in two different cable ducts (internal and external). Moreover, in order to make the alignment of the two sections of the track easier, we designed a cavity in which installers can insert a special guide-bar to make the operation quicker.

N.B. The maximum length for the track supply is 600cm (please verify your shipping options). To ensure the proper functioning of the cover, we do not supply cover segments that are longer than 120cm.

E.g. If you order 300cm of track and cover, you will receive one track (300cm) and 3 cover segment (100cm each).

Finishing code	Finishing
70	Anodized
75	Chrome plated
XX	Varnished

Wall mounted horizontal track
with cover and side caps

It is the ideal choice when it comes to making the Profilo Smart's elegant design stand out in the environment. The cover is an aluminium profile with a sleek and smooth design offered in 3 different standard finishing (anodized, chrome plated or varnished with any possible colour) and a variety of other customized ones (gold plated, laser-printed, engraved, etched, printed etc.).

The aluminium side caps have the same colour as the cover.
Item code	Length

SHOWER AREA

Shower Seat

Our range of shower seats has an aluminium structure with internal components comprised of stainless steel and nylon.

The arm support areas are made of lacquered thermoplastic with a non-slip, warm touch and scratch-proof finish.

The backrest and the sitting cushions (easy to remove for cleanings or replacement) are made of XL EXTRALIGHT®, which means they are light, flexible, comfortable and anti-bacterial.

Wall mounted shower seat

Foldable shower seat designed for our line of fixed, wall mounted products. This product is ideal for users with similar, stable conditions and it is particularly suited for public areas. It is a comfortable and highly hygienic product: the sitting cushion (XL EXTRALIGHT) results to be light, flexible and anti-bacterial.

WASHBASIN AREA

Washbasin brackets

Our range of brackets are designed to help the user to adjust the height of the washbasin in order to address different needs. No tools are required for any adjustment which is a great advantage for both users and caregivers.

Our washbasin brackets have an aluminium structure with internal components comprised of stainless steel and nylon; they are height adjustable with a 29 cm excursion and are equipped with a quick blocking system for additional safety.

The horizontal plaque comes without fixing holes and it is available in 3 standard sizes (60 cm, 90 cm, 100 cm) or in a custom size.

Wall mounted washbasin bracket
height adjustable

The washbasin bracket is necessary when it comes to fit the height of a washbasin to the needs of different users. The height of this bracket is manually adjustable and does not require any tools: a great advantage for caregivers.

Washbasins

Our range of ergonomic washbasins in white Solid Surface is designed to be fixed on the special adjustable bracket or to be wall mounted. It is the ideal solution when it comes to addressing the needs of wheelchair users. The ergonomic washbasins have a slim and light structure, the lack of seams and cracks of the Solid Surface inhibits the growth of germs and bacteria, all of which make the product even more durable. It is non-porous making it stain resistant and extremely easy to clean.

Ergonomic washbasin (60 cm)

In the frontal side of this ergonomic washbasin, an embedded grab bar helps the user to reach the area without effort and a small water collector has been designed to avoid the water spillage during shaving or tooth brushing. On the lateral side a towel holder can be mounted easily (not included).

It comes in 2 models, with or without overflow hole. You can choose the white version or you can request a colour of your choice.
